Abstract: In recent day, human communication can be facilitated by many means such as telephone, television, or other internet media such as email or chat program. In Chatting, user usually will be provided with a blank box that can be used to enter text to be sent to the other user. Since text only cannot provide human need in expressing him/herself then the current chat program includes features such as emoticon an avatar. Unfortunately, these features cannot fulfill the other human need about expressing their chatting environment. The research performed will try to provide chatting environment – that is called virtual world – and will evaluate its effect to the user. Some users will be asked to use the nvironment provided chatting program and to give comment to the program. From the respondent respons, the additon of the virtual world are considered excellent and interesting to be used in chatting program.

Keywords: Chatting, Virtual World, Reality.
