

## INTISARI

Penelitian ini bertujuan untuk menganalisis pengaruh *trade openness*, *human development index*, dan *foreign direct investment* terhadap *gross domestic product* di negara-negara ASEAN-5 (Indonesia, Thailand, Singapura, Malaysia dan Filipina) periode 2005-2014. Penelitian ini menggunakan pendekatan kuantitatif dengan model regresi panel data. Hasil penelitian ini menunjukkan bahwa *trade openness* memberikan pengaruh positif signifikan terhadap *gross domestic product* pada level kuadrat. Begitu pula *human development index* dan *foreign direct investment* secara sendiri-sendiri berpengaruh signifikan secara statistik terhadap *gross domestic product*. Sehingga dapat disimpulkan bahwa variabel internal dan eksternal dari negara ASEAN-5 memiliki pengaruh positif dan signifikan terhadap *gross domestic product*.

**Kata kunci:** *trade openness*, *human development index*, *gross domestic product*, ASEAN-5

## **ABSTRACT**

*This study aims to analyze the effect of trade openness, human development index, and foreign direct investment on gross domestic product in ASEAN-5 countries (Indonesia, Thailand, Singapore, Malaysia and Philippines) for 2005-2014 period. This research uses quantitative approach with panel data regression model. The results of this study indicate that trade openness has a significant positive effect on gross domestic product at quadratic level. Similarly, human development index and foreign direct investment individually have a statistically significant effect on gross domestic product. So it can be concluded that internal and external variables of ASEAN-5 countries have a positive and significant influence on gross domestic product.*
