ABSTRACT

This study aims to prove the effect of communication service quality, delivery service quality, after-sales service quality, and staff service quality on customer satisfaction in the e-commerce company Tokopedia. The type of research used is basic business research with causal objectives and quantitative research approaches. This study uses a sample of Tokopedia customers who have shopped at Tokopedia in the past a year and have experienced on product discrepancies.. The number of respondents used in this study was 150 people. The analysis in this study is Pearson correlation and multiple linear regression analysis, which is then processed using SPSS version 16 for windows software used to test the correlation and effect between the independent variables and the dependent variables that studied.

The results of this study show that communication service quality, delivery service quality, after-sales service quality, and staff service quality have a correlation and significant positive influence on customer satisfaction.

Keywords: *communication service quality, delivery service quality, after-sales service quality, staff service quality, customer satisfaction.*
