ABSTRACT

This thesis aims to determine the influence of subjective norms, religiosity, and attitude towards the purchase intention of the product "Halal". The object used in this thesis is Emina Cosmetic products in Surabaya. Data processing was performed using Structural Equation Modeling (SEM) with AMOS software version 22 for windows. The data used in this study are primary data obtained from questionnaires. Respondents in this study were 151 respondents who have used Emina products in the past 1 year. The sampling technique of this study was non probability sampling with purposive sampling. The results of this study indicate that there is a significant positive effect between subjective norm and attitude on the purchase intention of the Emina products in the "Halal" category. While religiosity do not have an influence on the purchase intention of the Emina products in the "Halal" category.

Keywords : Brand Halal, Subjective Norm, Religiosity, Attitude, Purchase Intention.
