ABSTRACT

This study aims to analyze the effect of speed, responsiveness, flexibility, and competence as factors of supply chain agility on the profitability of the construction company PT. Waskita Karya Tbk. This research uses a quantitative approach with the Structural Equation Modeling method. The data used in this study are primary data obtained from the results of distributing questionnaires. Respondents in this study were 102 respondents who were permanent employees with a minimum work experience of more than 1 year in the Supply Chain Management, Purchasing, Engineering Procurement Construction, Building, and Infrastructure Divisions. The results of this study indicate a positive and significant influence between supply chain speed, flexibility, and competence on the profitability of PT. Waskita Karya Tbk. Meanwhile, supply chain responsiveness has no effect on the profitability of PT. Waskita Karya Tbk.

Keywords: Speed, Responsiveness, Flexibility, Competence, Profitability
