ABSTRACT

The development of boardgames in Indonesia are increasingly fast with various types of boardgames. One of them contains smart games, where there are several educational aspects that are used with the aim of increasing one's intelligence by playing the board game. In addition, the boardgame also has various types of storylines, one of which are mystery, bluffing. In the storyline, the game uses a mysterious storyline to provide a spooky and tense atmosphere, where one of the players betrays so that it can increase someone's interest in solving the problem so that the player can defeat the evil party. So, the researchers took the boardgame genre with mysterious nuances based on education in order to help improve the intellectual intelligence of young adults in Indonesia without inviting boredom because smart games tend to have no storyline so that the game seems boring. For data management, researchers used studies of existing products, articles, journals, surveys in the form of questionnaires along with IDI (In Depth Interview) in order to find out more about what kind of board game products are most in demand by young adults in Indonesia. The design process used took the color palette from 2 films entitled "Da Vinci Code" and "Inferno". The result of this research is 1 set of mystery-themed boardgames by raising the educational aspect regarding the development of intellectual intelligence.
