2nd ICITD 2023

The 2nd International Conference on Infectious and Tropical Diseases (ICITD) in Conjunction with Clinical Microbiology Continuing Medical Education (CM-CME)

"Global Threats and Responses to Emerging and Re-Emerging Infectious Disease"

November 18-19, 2023

ASEEC Tower Universitas Airlangga

2nd ICITD 2023

The 2nd International Conference on Infectious and Tropical Diseases (ICITD) in Conjunction with Clinical Microbiology Continuing Medical Education (CM-CME)

Welcome Message

I Greeting from the Intitute of Tropical Disease UNAIR Chairman

Dear Colleagues,

We are delighted to invite you to the “**2nd International Conference on Infectious and Tropical Diseases (ICITD) 2023**” that will be on **November 18-19, 2023**. The RC GERID in collaboration with the Institute of Tropical Disease (ITD), Universitas Airlangga proudly presents this conference to answer the current challenges and research outcomes in the relevant fields.

The theme of the 2nd ICITD is Global Threats and Responses to Emerging and Re-emerging Infectious Diseases. This conference will bring up shared knowledge and insight to help scientists, medical experts, health workers, scholars, and authorities contribute to the wellness of public health.

We invite excellent speakers who will deep dive to the current research and knowledge. We also welcome oral and poster presentations for all of you to discuss and exchange ideas and feedback from fellow scientists. Win reputable publication opportunities in SCOPUS or SINTA indexed journals for selected papers only. On behalf of the Organizing Committee, we look forward to welcoming you to ICITD 2023.

Best regards,

Prof. Dr. Maria Inge Lusida, dr., M.Kes., Ph.D, Sp.MK(K)
Head of Institute of Tropical Disease, Universitas Airlangga

2nd ICITD 2023

The 2nd International Conference on Infectious and Tropical Diseases (ICITD) in Conjunction with Clinical Microbiology Continuing Medical Education (CM-CME)

Welcome Message

I Greeting from the RC-GERID Chairman

Dear Colleagues,

Dear colleagues, It is my great pleasure to warmly invite you to an 2nd International Conference on Infectious and Tropical Diseases (ICITD) hosted by Research Center on Global Emerging and Re-emerging Infectious Diseases, Institute of Tropical Disease at Universitas Airlangga. The conference will be held on 18-19 November, 2023 at ASEEC Tower Universitas Airlangga.

The conference theme is **Global Threats and Responses to Emerging and Re-emerging Infectious Diseases**. The term “emerging infectious diseases” refers to diseases of infectious origin whose incidence in humans has either increased within the past two decades or threatens to increase in the near future. To effectively address emerging infectious diseases, we need to develop a strategic plan emphasizing surveillance, research, and prevention activities necessary to maintain a strong defense against infectious diseases that affect, or threaten to affect, the public’s health. Many factors or combinations of factors can contribute to disease emergence. Newly emergent infectious diseases may result from changes in or evolution of existing organisms; known diseases may spread to new geographic areas or human populations; or previously unrecognized infections may appear in persons living or working in areas undergoing ecologic changes (e.g., deforestation or reforestation) that increase human exposure to insects, animals, or environmental sources that may harbor new or unusual infectious agents. Infectious diseases may reemerge because of either the development of antimicrobial resistance in existing agents (e.g., gonorrhea, malaria, pneumococci) or breakdowns in public health measures for previously controlled infections (e.g., cholera, tuberculosis, and pertussis). The conference will bring together academics, researchers, practitioners and research students from around the world to discuss the about this issues and disseminate their research.

I am confident that you will enjoy a stimulating conference here in the city and that your presence and participation will help contribute to this vibrancy and enrich discussions around the theme, developing professional knowledge exchange, insights and collaborations. We invite you, therefore, to submit proposals for paper presentations, symposium, practical workshops, poster displays, and join us at this international conference to explore various results to tackle and reduce of Global Threats to Emerging and Re-emerging Infectious Diseases.

The Conference Organizing Committee and I look forward to welcoming you to this exciting event and to meeting all of you in person in November 2023 in Indonesia.

Best regards,

Laura Navika Yamani, Ph.D

Head of Research Center on Global Emerging and Re-emerging Infectious Diseases, Institute of Tropical Disease, Universitas Airlangga

2nd ICITD 2023

The 2nd International Conference on Infectious and Tropical Diseases (ICITD) in Conjunction with Clinical Microbiology Continuing Medical Education (CM-CME)

PROGRAM SCHEDULE

Day 1: November 18, 2023

Time (WIB)	Event
07.30-08.10	Registration and Coffee Break
08.10-09.00	Opening
	Singing National Anthem "Indonesia Raya"
	Singing Hymn of Universitas Airlangga
	Performance: Traditional Welcome Dance
	Welcoming speech Prof. dr. Maria Inge Lusida, M.Kes., Ph.D., Sp.MK(K) (Head of ITD Universitas Airlangga)
	Welcoming speech dr. Anis Karuniawati, Sp.MK(K), Ph.D (Head of PAMKI, Indonesia)
	Opening speech Prof. Dr. Bambang Sektiari Lukiswanto, DEA, DVM (Vice Rector Universitas Airlangga)
	Photo Session
GENERAL SESSION – DAY ONE	
Venue: Majapahit, 5th floor	
Keynote Speech	
09.00-09.05	PIC Keynote speakers: MC (Ms. Vero, AGE)
09.05-09.30	Keynote Speaker I: Dr. Tamara Curtin Niemi WHO Representative of Indonesia
09.30-09.55	Keynote Speaker II: Ir. Budi Gunadi Sadikin, CHFC, CLU Minister of Health of the Republic of Indonesia
09.55-10.20	Keynote Speaker III: Dr. Peter Bogner President of GISAID, USA
10.20-10.25	Photo Session

2nd ICITD 2023

The 2nd International Conference on Infectious and Tropical Diseases (ICITD) in Conjunction with Clinical Microbiology Continuing Medical Education (CM-CME)

PROGRAM SCHEDULE

Plenary Lecture – Day One	
10.25-10.30	Moderator Session 1: Prof. Soetjipto, dr., M.S., Ph.D
10.30-10.50	Prof. Dr. Eddy Bagus Wasito, dr., MS., Sp.MK(K) (Ethic and Patient Safety)
10.50-11.10	Invited Speaker I: Prof. Stephen Todryk Northumbria, United Kingdom (Immunology)
11.10-11.30	Invited Speaker II: Prof. Maria Inge Lusida, dr., Ph.D., Sp.MK(K) Universitas Airlangga, Indonesia (Rotavirus)
11.30-11.55	Discussion
11.55-12.00	Certificate Session
12.00-13.00	Break Time (ISOMA)

2nd ICITD 2023

The 2nd International Conference on Infectious and Tropical Diseases (ICITD) in Conjunction with Clinical Microbiology Continuing Medical Education (CM-CME)

PROGRAM SCHEDULE

PARALLEL SYMPOSIUM AND ORAL/POSTER PRESENTATION		
SYMPOSIUM SESSION 1-TOPIC: Global AMR and Viral Diseases		
Invited Speakers		
	CME Symposium CME SYMPOSIUM - 1 Topics: Global AMR Venue: Majapahit, 5 th floor	ICITD Symposium ICITD SYMPOSIUM - 1 Topics: Viral diseases Venue: Rote, 4 th floor
	Moderator: Dr. Agung Dwi Wahyu Widodo, dr., M.Si., M.Ked.Klin., Sp.MK(K)	Moderator: Dwi Wahyu Indriati, Ph.D
13.00-13.15	Speaker 1: Prof. Dr. Ni Made Mertaniasih dr., MS, Sp.MK (K) (AMR in Tuberculosis)	Speaker 1: Prof. Kazufumi Shimizu (“A self-limited ending of a SARS-CoV-2 epidemic with a remarkable decrease in the viral loads along with accumulations of mutations in the genome”)
13.15-13.30	Speaker 2: Dr. Eko Budi K. dr. M.Kes., Sp.MK(K) (AMR Gram Positive)	Speaker 2: Laura Navika Y, Ph.D (Molecular dynamics changes of rotavirus genotypes and its recombination with animal strains among pediatric patients in Indonesia during 2015-2023)
13.30-13.45	Speaker 3: Dr. Muhammad Vitanata Arfijanto, dr., Sp.PD(K), K-PTI., FINASIM (AMR Gram Negative)	Speaker 3: Siti Qamariah Khairunisa, M.Si. (The Evolutionary Characteristic and Spatial-Temporal Transmission of HIV-1 CRF01_AE in Indonesia using Nearly Fullgenome Sequence)
13.45-13.55	Discussion	Discussion
13.55-14.00	Photo Session	Photo Session
14.00-14.30	Coffee Break	

2nd ICITD 2023

The 2nd International Conference on Infectious and Tropical Diseases (ICITD) in Conjunction with Clinical Microbiology Continuing Medical Education (CM-CME)

PROGRAM SCHEDULE

SYMPOSIUM SESSION 2-TOPIC: Global HAIs		ORAL/POSTER PRESENTATION
Invited Speakers		Oral/Poster Presenters
	<p>CME Symposium CME SYMPOSIUM - 2 Topics: Global HAIs Venue: Majapahit, 5th floor</p>	<p>Start :14.30</p> <p><u>Oral/poster presentation</u> Oral presentation:</p> <ul style="list-style-type: none"> - Room I : Rote, 4th floor - Room II : Dayak, 4th floor - Room III : Asmat, 4th floor <p>Moderator oral presenters:</p> <ol style="list-style-type: none"> 1. Abstract

Background: Pandemics such as Spanish flu, SARS, and COVID-19 have occurred and are likely to happen in the future. This study evaluates critically ill patient characteristics and their medications.

Methods: The study collected medical records of severe to critically ill COVID patients in the ICU from five hospitals. Data gathered included gender, age, severity, length of stay, and comorbidities. Data on drug use was collected, including type, dose, frequency, and duration were analyzed descriptively. The study investigated the effectiveness of antibiotics and antivirals using a mixed-logit regression model at a significance level of 5%.

Results: Among 244 COVID-19 patients, 181 were over 45 years old, and 124 were critically ill. Antibiotics, antivirals, and steroids were the most drugs used for COVID-19 treatment. Some commonly used drugs include levofloxacin, moxifloxacin, azithromycin, remdesivir, mefenamic acid, ceftazidime, dexamethasone, and favipiravir. Meropenem, a broad-spectrum antibiotic, was also used as a treatment for COVID-19 patients (0.7-41.2 DDD per 100 bed days). Dexamethasone increases the likelihood of patient recovery with an odds ratio of 3.95 [1.81-8.68].

Conclusions: Antibiotic overuse contributes to resistance despite limited evidence. Remdesivir is preferred over Favipiravir for severe COVID-19. Studies show mixed results for antiviral benefits in patient outcomes. It is necessary to conduct further research on an appropriate therapy, develop neither new drug nor repurposing drug, for the flu virus.
