

COLLABORATION OF CLINICAL PHARMACOLOGIST AND CLINICAL PHARMACIST IN DRUG UTILIZATION REVIEW AS ACTIVE MONITORING OF ADVERSE DRUG EVENT IN HOSPITAL

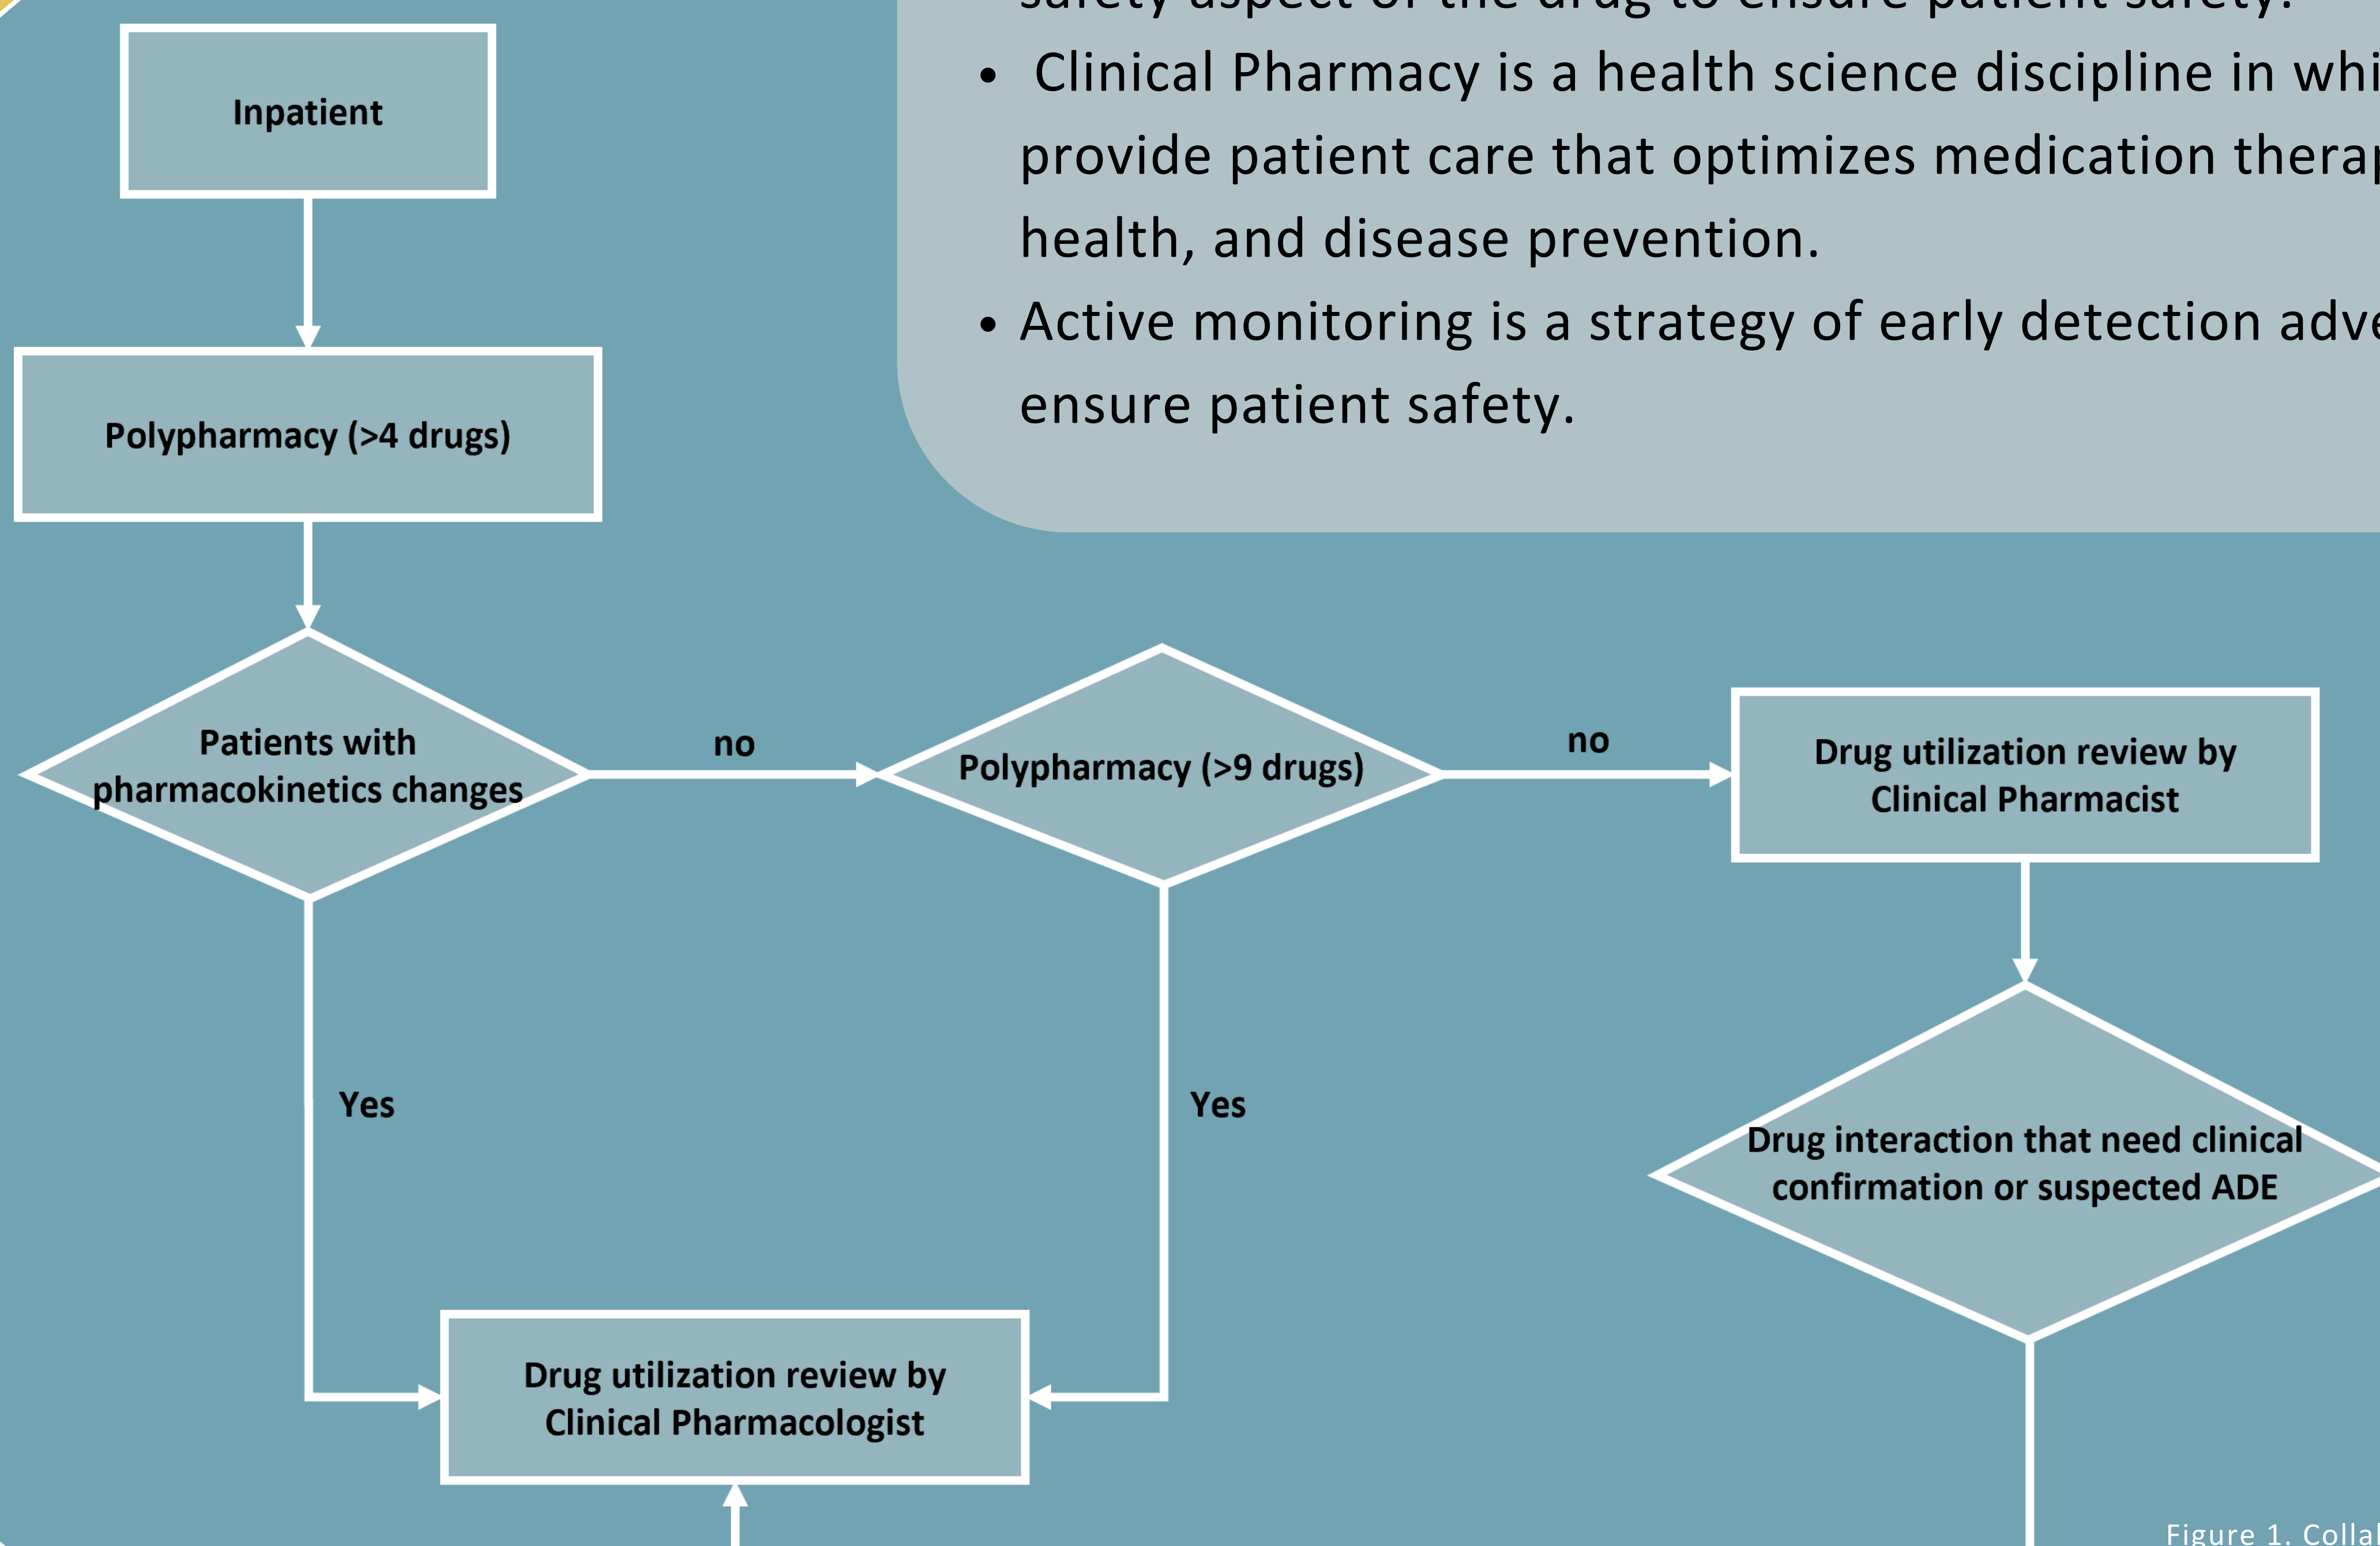

Jefman Efendi Marzuki HY¹, Risa Septinia²

1. Clinical Pharmacology, Universitas Surabaya, Surabaya, Indonesia

2. Clinical Pharmacy, Surabaya, Indonesia

INTRODUCTION

METHOD

- Clinical Pharmacologist is a specialist physician who focus on drug use in clinical setting in the term of pharmacokinetics, drug concentration, and safety aspect of the drug to ensure patient safety.
- Clinical Pharmacy is a health science discipline in which pharmacists provide patient care that optimizes medication therapy and promotes health, and disease prevention.
- Active monitoring is a strategy of early detection adverse drug reaction to ensure patient safety.

RESULTS

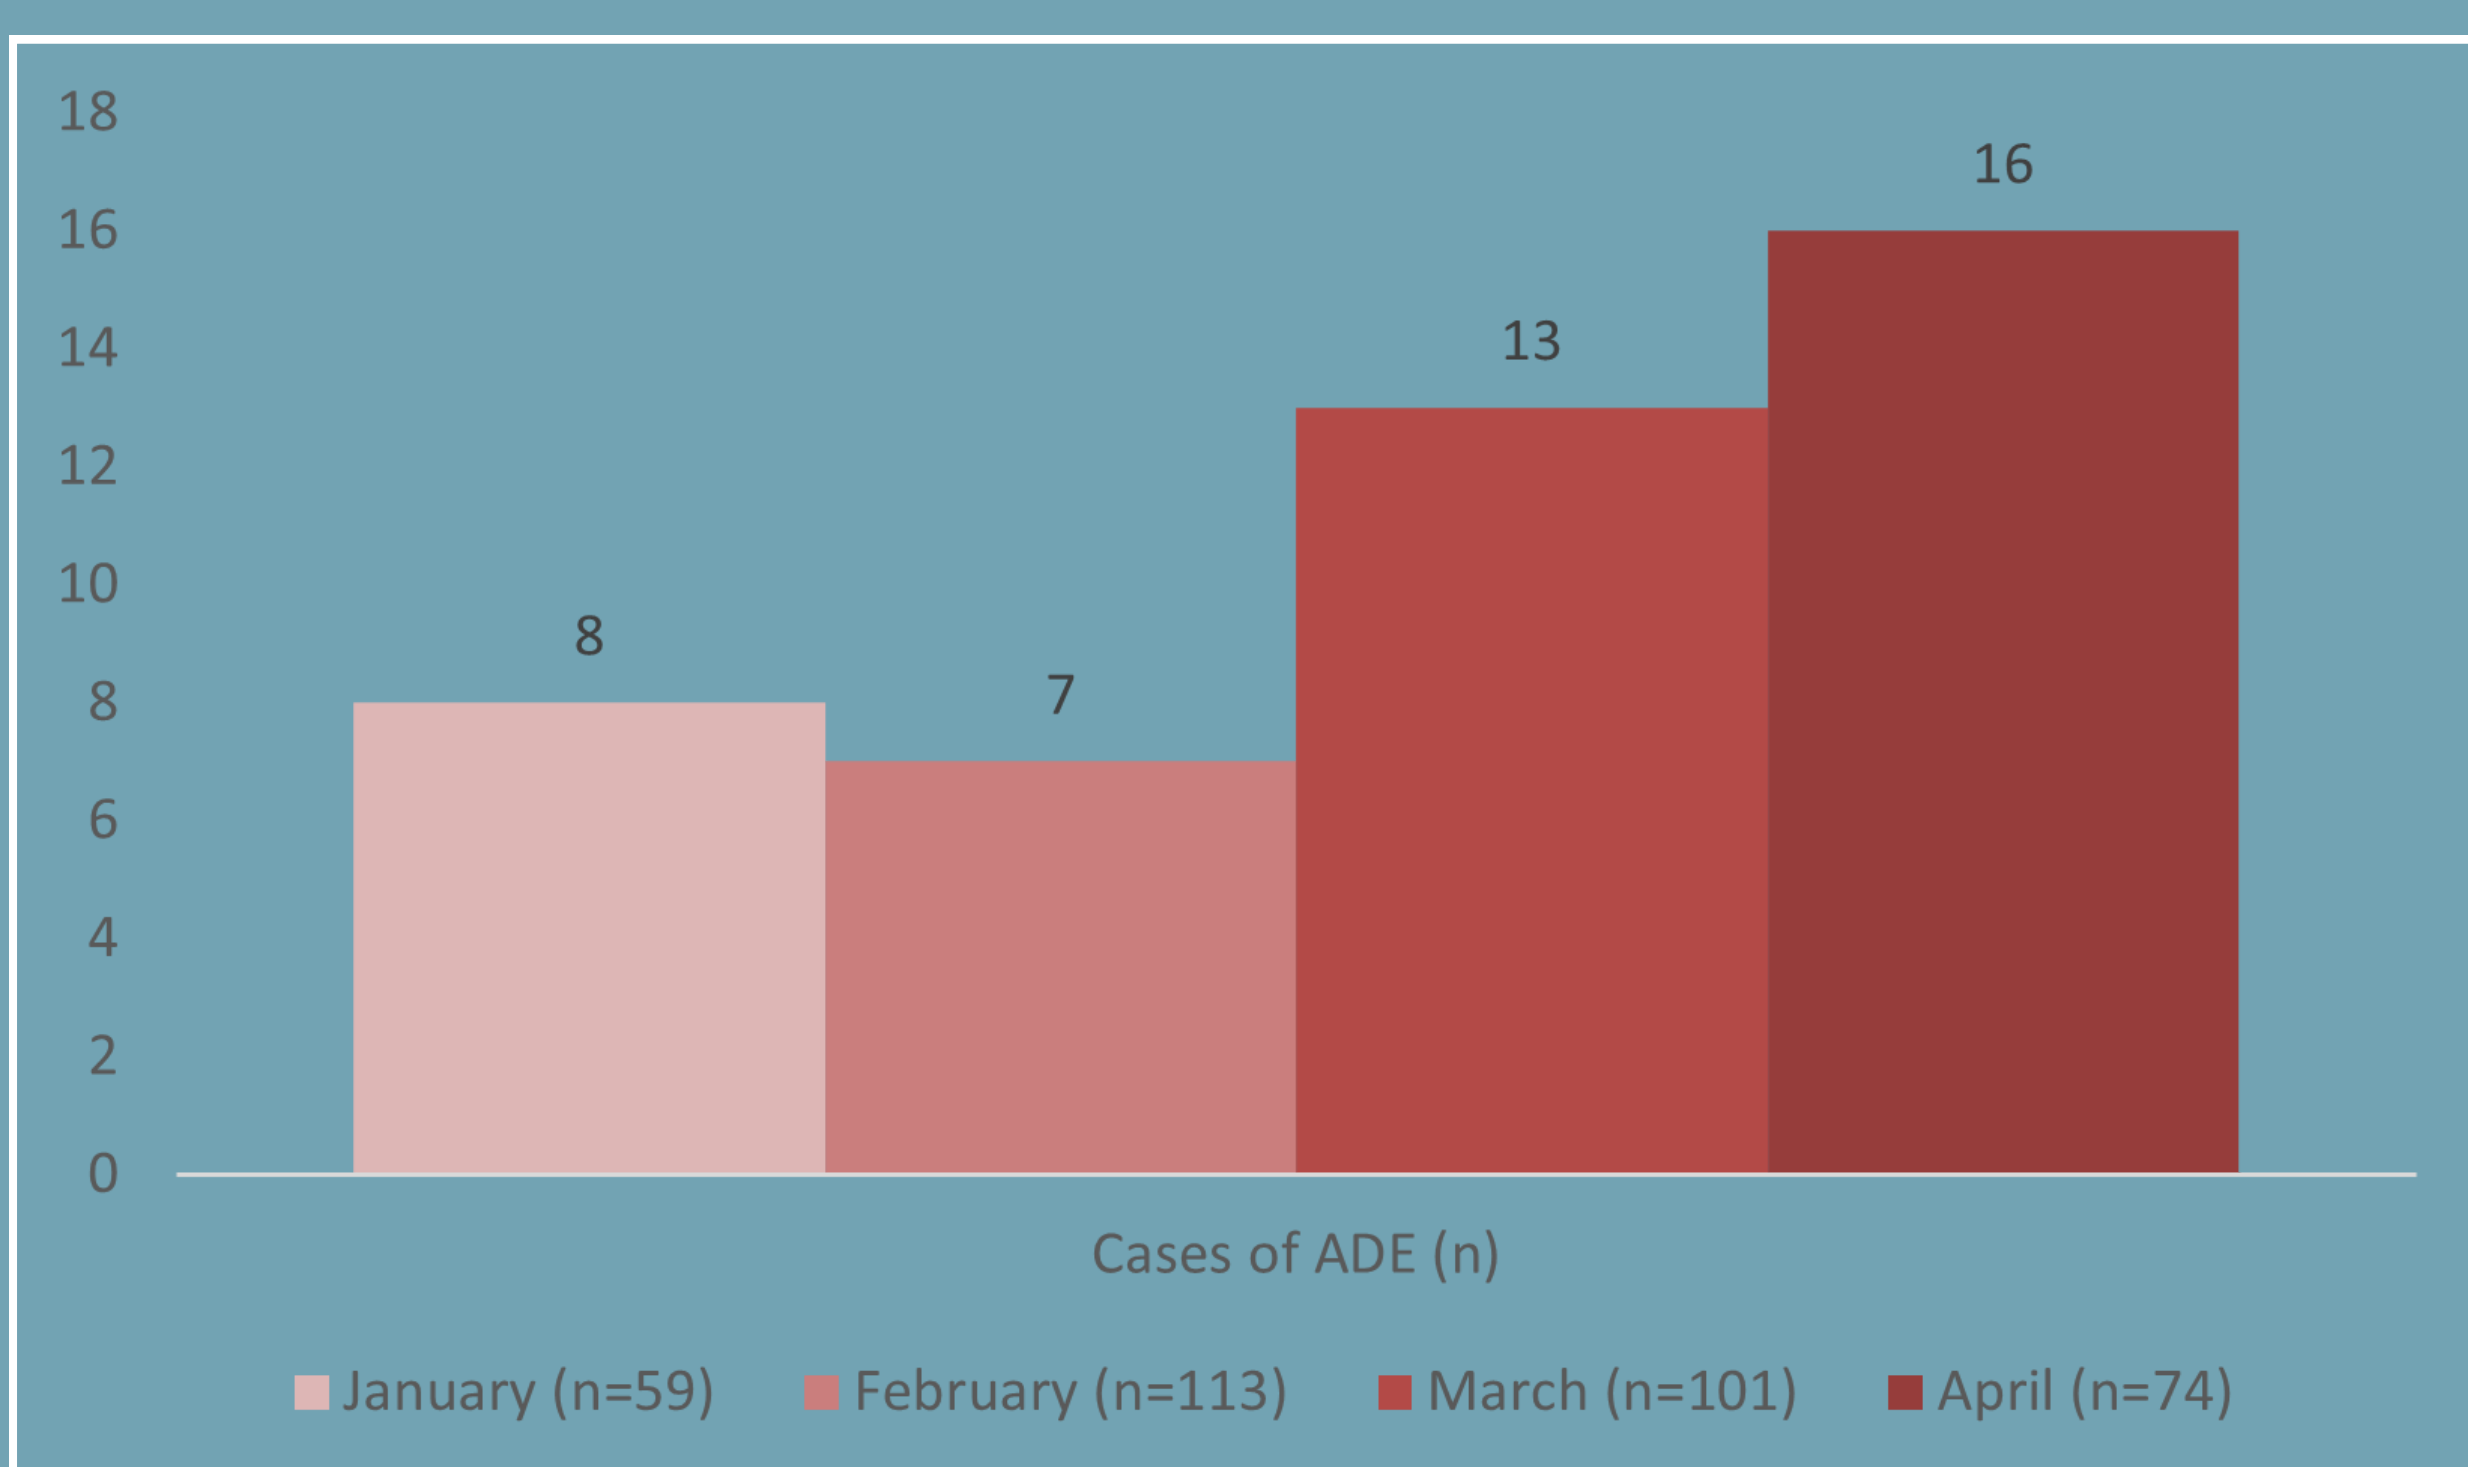

Figure 2. Number of ADE cases per month

Figure 3. Type of ADEs during active monitoring

CONCLUSION

Increasing awareness of ADE through active monitoring and early detection could be a potential strategy to ensure patient safety in hospital.
