

CONCLUSION AND SUGGESTION:

The role of pharmacists in pharmaceutical care in ambulatory asthma patients is a direct counseling to patients and monitoring the use of medications for ambulatory (able to use PMRs/Patient Medication Records). Monitoring treatment of patients on a regular basis and analyze the occurrence of drug-related problems that would/could/have been experienced by patients taking optimal treatment, effective, safe and rational.

ACKNOWLEDGMENTS

Thanks to dean and associates IN Pharmacy Faculty of Surabaya University, health care teams in Adi Husada Undaan Wetan Hospital, Surabaya and all those who have supported the preparation of this research.
