INTRODUCTION

Environmental damage has become a global problem, and Indonesia is also one of the countries that suffered from it. This damage in Indonesia has reached 40-50% of the total area. (<http://news.okezone.com/read/2012/09/06/340/685946/kerusakan-lingkungan-di-indonesia-capai-50> downloaded on 21 May 2013). One of the environmental damage that is being discussed is global warming or global warming. Global warming is increasing the average temperature at the earth's surface.

One of the main causes of global warming comes from the excessive use of electrical energy (http://www.wwf.or.id/berita_fakta/blog/?uNewsID=24700 downloaded on May 22, 2013). Electricity becomes the main source to support all human activities, especially in the household, where many electronic device used. As tropical country one electronic device that need large power is air conditioner (AC). The use of AC contributed by 70% in households that can contribute to global warming (<http://techno.okezone.com/read/2011/01/01/324/409424/large>
