ABSTRACT

Malaria is a common protozoan infection that is responsible for worldwide mortality and economic burden on the society. One of the most common central nervous system diseases in tropical countries is cerebral malaria (CM). *Plasmodium falciparum* (Pf) caused Cerebral Malaria may be lethal. Many pathophysiological hypotheses underlying cerebral malaria have been revealed. But what has developed until now is the mechanical, permeability and humoral hypothesis. In this review article, emphasized how pathogenesis of the disease is effected by the parasite and host responses including blood brain barrier (BBB) disruption, endothelial cell activation and the role

nitric oxide and neuroinflammation. In these hypotheses the aspects involved are expressed and many are still not understood. Understanding this will help in the treatment of cerebral malaria.

KEYWORDS: Malaria, *Plasmodium*, Cerebral Malaria, Pathogenesis, Cytoadherence.

INTRODUCTION

Malaria is a major public health problem in the developing world owing to its high rates of morbidity and mortality. Of all the malarial parasites that infect humans, *Plasmodium falciparum* is most commonly associated with neurological complications, which manifest as agitation, psychosis, seizures, impaired consciousness and coma (cerebral malaria).^[1] Cerebral malaria is an infection of parasites caused by malaria in the brain. this is one form of malignant malaria with high mortality. *Plasmodium falciparum* as the main cause. This disease is characterized by decreased awareness, symptoms and signs other neurologists, and symptoms of tropical malaria in general. Malaria remains one of the most prevalent infectious diseases in the world. The World Health Organization (WHO) reports that 50% of the world's population living in 109 countries are still at risk of malaria. Approximately 1% of *P.*

falciparum infections results in Cerebral Malaria with 90% of these cases in children in sub-Saharan Africa. In adults in South-East Asia, Cerebral Malaria accounts for 50% of the malaria deaths, as they not only suffer from encephalitis but also have multiple organ failure.^[1] Several processes have been implicated in Cerebral Malaria pathogenesis, including microvascular obstruction by *P. falciparum*-parasitized red blood cell, excessive proinflammatory cytokine production microvascular thrombosis, loss of endothelial barrier function and endothelial dysregulation.^[2] The way these pathological mechanisms are linked and how they are by host and parasite factors remains to be elucidated. In addition, the reason why circulating cytokines, coagulation factors, or PRBC specifically target only the brain in African children, and the brain as well as other organs in Southeast Asian adults, are still unclear.^[3] Other studies too linking the role of inflammation and cytoadhesion as the etiology of the occurrence of cerebral malaria.^[1] The exact diagnosis of cerebral malaria is post-mortem where brain hemorrhage and lesions will be found in the brain with accumulation of erythrocytes in microvascular cells.^[1] In this paper we will discuss some of the latest research on *falciparum* malaria and pathogenesis to see cerebral malaria to see future developments in improving neurological damage clinical improvement in cerebral malaria.

Etiology

The five *Plasmodium* species that infect humans are: *P. falciparum*, *P. vivax*, *P. ovale*, *P. malariae*, *P. knowlesi*. The causes of cerebral malaria are mainly *P. falciparum*, while *P. vivax* and *P. knowlesi* can also be, but although rarely.^[4]

Malaria Parasite

Cycle in Human

Infection of the malaria parasite begins when a female *Anopheles* mosquito bites a human and releases sporozoite into a blood vessel. Sporozoites will live and enter the heart. Part of *Plasmodium* will be damaged by the immune system, others will survive. In the liver parenchyma cells, asexual development (intrahepatic schizogony) begins, called the pre-erythrocyte or erythrocytic stage. After that the parasites enter the circulation to infect the erythrocytes and damage the erythrocytes so that the merozoites are released inside circulation, this is called the erythrocytic stage. Then the parasite changes to sizont, and if ruptured sizonts will produce 6-36 merozoites and ready to infect other erythrocytes.

Cycle in Anopheles

In the blood, some parasites will form microgamethocytes and macrogamethocytes, if they are mosquitoes sucking sick human blood will occur the sexual cycle in the body of the mosquito. Multiplication of parasites in mosquitoes is known as a cycle sporogenic. When inside the microgamet mosquito's stomach macrogamets produce zygotes to produce zygotes. More zygotes moves into an ookinet that pierces the mosquito's stomach wall and will eventually form an oocyst that will grow, break, and removing sporozoites that migrate to the mosquito's salivary gland and are ready to infect humans^[5] (see picture 1)(CDC,2016).

Picture 1: Cycle of *Plasmodium falciparum*.

Cerebral Malaria

Cerebral malaria occurs as a complication of severe malaria caused by *Plasmodium falciparum*. Cerebral malaria is one of the manifestations of severe malaria characterized by behavioral disorders, disorders consciousness, convulsions, coma, and other neurological disorders.^[5] The commonly accepted clinical definition of Human Cerebral Malaria is the neurological syndrome with patients in unrousable coma. Seizures, retinopathy and brainstem alterations due to elevated intracranial pressure and brain swelling are also clinical features frequently observed during Human Cerebral Malaria to meet the Cerebral Malaria definition, *P. falciparum* infection has to be confirmed and other causes of encephalitis (of viral or bacterial origins) to be excluded. However, in field settings with limited resources, only easily

diagnosed or obvious infectious diseases with brain involvement are investigated. Many viral, bacterial and parasitic infections can alter Plasmodium infections or pathologies and the reverse is also true.^[6]

Pathogenesis

Erythrocytes added by *P. falciparum* will improve the sequestration process, which is the spread of parasitic erythrocytes to the capillary vessels of organs in the body. Erythrocytes containing young parasites (ring shape) circulate in peripheral blood but mature parasitic erythrocytes are localized to the organ blood vessels. On the surface of the erythrocyte that is easily injured will make a knob containing various *P. falciparum* antigens.^[1] Cytokines (TNF, IL-6 and others) are made by macrophages, monocytes, and lymphocytes cells will cause receptors to express capillary endothelium. At the time of the knob binding to capillary endothelial cell receptors there is a cytoadherence process. The result happened capillary obstruction that causes tissue ischemia. The occurrence of this blockage is supported by the formation of "rosette", which is a cluster of red blood cells that have parasites with other red blood cells.^[6] (see picture 2).

Picture 2: Cytoadherence and rosetting.

Pathophysiology of Cerebral Malaria

The pathophysiological mechanism underlying cerebral malaria is not fully understood. Some recent clear theories on cerebral malaria, namely the mechanical, permeability, and humoral hypothesis (see picture 3). i) Mechanical hypothesis related to infected red blood cells (iRBC) cytoadherence and decrease deformability, causes anemia, rosette formation and microvascular obstruction; ii) The permeability hypothesis is based on a blood brain barrier (BBB) disturbance and an increase in permeability vascular, followed by toxic compounds

that reach the brain parenchyma and cause neurological disorders; iii) The humoral hypothesis focuses on increasing the production of pro-inflammatory molecules, including cytokines and chemokines, and other dissolved factors such as reactive oxygen species (ROS), which are responsible for inflammation, fever and coma during cerebral malaria.^[7,11]

Picture 3: Pathophysiology Hypotesis of Cerebral Malaria.

Mechanical Hypotesis

Cytoadherence

Infected erythrocytes will experience attachment to uninfected erythrocytes (forms a rosette) and also attaches to other infected erythrocytes (autoagglutination). Besides the cytoadherence process which results in obstruction capillaries, this blockage is also supported by the formation of rosette.^[5] *P.falciparum* infection is a membrane knob called PfEMP-1 is found on the erythrocyte surface which mediates the attachment of erythrocytes on capillary and venule endothelial receptors, called cytoadherence.^[2] Vascular endothelial cell receptors that bind to (see picture 4) PfEMP-1 are CD-36, Intercellular adhesion molecular-1 (ICAM-1), Vascular cell adhesion molecu-1 (VCAM-1), PECAM-1, ELAM-1, thrombospondine and Chondroitin sulfate. Of several capillary and venule endothelial receptor proteins identified, ICAM-1 is considered the most important role in the pathogenesis of cerebral malaria.^[7]

Picture 4: Vascular endothelial cell rece.

Permeabilization Hypothesis

Blood Brain Barrier (BBB) Disorders

One structure that is important in protecting the nervous system of the brain is the blood brain barrier (BBB) or blood brain barrier. BBB constituent component: capillary endothelial cells, pericytes, foot processes of astrocytes and basal membranes and neurons that make up neurovascular units.^[8] Brain endothelial cells differ from endothelial cells found in other organs; they have intracellular tight and adherens junctions which impede passive paracellular diffusion of small and large molecules and prevent infiltration of blood borne cells into brain parenchyma.^[9] During infection, pathogens invade endothelial cells and modulate vascular permeability. Endothelial cells are semiprofessional antigen presenting cells, triggering T cell costimulation and activation of specific immune cells. This results in the release of inflammatory mediators and damage to cells infected by effectors such as CD8 + T cells which play a major role in cerebral malaria.^[7] This barrier disorder can cause pathology through edema and inflammation. During infection, barrier disorders can be caused by the release of active mediators, the interaction of microbial components with endothelial cell receptors (immunoglobulin; Toll-like receptor, TLR), and interactions with pathogens and leukocytes which can be followed by activation of the transmigration pathway. During malaria infection parasitic antigens transfer to endothelial cells.

Humoral Hypothesis

This hypothesis shows that host factors such as leukocyte-derived cytokines and chemokines can enter the brain parenchyma after increasing BBB permeability, which causes symptoms of cerebral malaria such as fever and coma.^[7]

Cytokines and Chemocin

Cytokines are produced in response to microbes and parasites. The result is an increase in TNF α , IFN γ , IL-1, IL-3, and IL-6.¹⁴ TNF α responsible for the emergence of clinical manifestations cerebral malaria, including increased vascular permeability, impaired glucose metabolism (glucose transport, gluconeogenesis at liver, and glycolysis), and sequestration. TNF α and IL-1 can increase tissue factor expression in endothelial cells and mononuclear cells. A characteristic feature of Plasmodium infection is endothelial activation, which is likely induced by elevated serum tumor necrosis factor (TNF) levels. Binding of TNF to its receptor (TNFR1) induces transcription of adhesion molecules, including ICAM-1 and VCAM-1 and chemokine secretion. (see picture 5). Furthermore, it will start the thrombin activation pathway, which is the molecule that plays a role in the inflammatory cascade and coagulation process.^[5]

Picture 5: Endothelial activation and chemokine secretion.

NITRIC OXIDE (NO)

The role of NO in the pathogenesis of cerebral malaria is still controversial. But in several studies it was said that NO is a key factor for TNF in the pathogenesis of cerebral malaria. NO plays a role in host's body defense, maintain vascular status, and also as effector of TNF. Cytokines will increase NO synthesis in brain endothelial cells and result in an increase in NO production. Increased NO activity can change the rate of blood flow and reduce glutamate uptake, resulting in toxicity to brain tissue.^[9,10] NO can move and penetrate the blood brain barrier, diffuse into brain tissue, and will interact with neurotransmitter, and this plays an important role in the mechanism of coma in cerebral malaria.^[9,10]

CONCLUSION

Cerebral malaria is the heaviest complication of malaria. The species that can cause cerebral malaria is *P. falciparum*. The mechanism of the pathogenesis of cerebral malaria is not known with certainty but there are several theories that might explain the incidence of malaria cerebral. Several hypotheses of cerebral malaria have been described. Pathogenesis commonly used is the occurrence of sequestration or spread of infected erythrocytes so that it can clog arteries blood in the brain, this causes clinical symptoms in the form of a decrease awareness, behavior disorders, seizures, and death.

Welcome To WJPR!

WJPR is a worldwide multidisciplinary, monthly published, open access, peer-reviewed, online pharmacy journal. The aim of WJPR is to serve as a means for updating the scientific knowledge of the international audience in the pharmaceutical forum.

The Journal welcomes the original research articles, review, short communications and case studies relevant to the various fields of Pharmaceutical Sciences such as; Pharmaceutics, Pharmaceutical Technology, Biopharmaceutics, Pharmaceutical Chemistry, Pharmaceutical Analysis and Quality Assurance, Medicinal Chemistry, Pharmacology and Toxicology, Pharmacy Practice includes Hospital Community and Clinical Pharmacy, Pharmacognosy and Phytochemistry, Pharmaceutical Microbiology and Biotechnology, Regulatory Affairs and Pharmaceutical Marketing Research, and Alternative Medicines.

Journal Standards

- A broad ranging open access online journal.
- Eminent editorials from thought out the world.
- Fast online manuscript submission.
- Rapid publication high visibility.
- Our journal indexed in different reputed publisher databases.
- Gives Email/SMS alert updates.

The Journal particularly aims to foster the dissemination of scientific information by publishing manuscripts related to current Pharmaceutical Drug Delivery and related fields. We started with a Mission to encourage contribution to Research in Sciences & Technology for achieving better future lives for all. We serve Science & Mankind at the highest levels of Professional Ethical Conduct.

Research Article

TOXICITY STUDIES OF YOYO CLEANSER BITTERS POLYHERBAL FORMULATION IN ALBINO RATS (dashboard/abstract_id/)

Timipa R. Ogoun, Odangowei I. Ogidi* and Thomas Aye

[ABSTRACT \(https://www.wjpr.net/abstract_show/18271\)](https://www.wjpr.net/abstract_show/18271)[Article Download \(https://www.wjpr.net/abstract_file/18271\)](https://www.wjpr.net/abstract_file/18271)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18271\)](https://www.wjpr.net/abstract_show/18271)

[DOI : 10.20959/wjpr20221-22534]

**PHARMACOGNOSTIC, PHYTOCHEMICAL AND ANTIULCER PROPERTIES OF ETHANOL CRUDE EXTRACT AND FRACTIONS OF THE LEAVES OF PICRALIMA NITIDA DURAND AND HOOK (APOCYNACEAE)** (dashboard/abstract_id/)

Bruce S. O.*, Okoye C. L., Orji C. E., Ezeonyi E. I. and Ezewudo E. M.

[ABSTRACT \(https://www.wjpr.net/abstract_show/18273\)](https://www.wjpr.net/abstract_show/18273)[Article Download \(https://www.wjpr.net/abstract_file/18273\)](https://www.wjpr.net/abstract_file/18273)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18273\)](https://www.wjpr.net/abstract_show/18273)

[DOI : 10.20959/wjpr20221-22319]

**ANALYSIS OF VAGINAL MICROBIOME COMPOSITION OF IGBO WOMEN OF REPRODUCTIVE AGE WITH AND WITHOUT SYMPTOMS OF VAGINAL DYSBIOSIS** (dashboard/abstract_id/)

*Onyeulor P. N., Nwaokorie F. O. and Emele F. E.

[ABSTRACT \(https://www.wjpr.net/abstract_show/18274\)](https://www.wjpr.net/abstract_show/18274)[Article Download \(https://www.wjpr.net/abstract_file/18274\)](https://www.wjpr.net/abstract_file/18274)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18274\)](https://www.wjpr.net/abstract_show/18274)

[DOI : 10.20959/wjpr20221-22539]

**A POSSIBLE AMELIORATIVE ROLE OF CURCUMIN IN DECLINING THE SIDE EFFECT OF METHOTREXATE IN ADJUVANT INDUCED ARTHRITIS** (dashboard/abstract_id/)

Mohamed Hazem Al-Doori, Marwa T. Hassen* and Sahar S. Abd-Elhalem

[ABSTRACT \(https://www.wjpr.net/abstract_show/18275\)](https://www.wjpr.net/abstract_show/18275)[Article Download \(https://www.wjpr.net/abstract_file/18275\)](https://www.wjpr.net/abstract_file/18275)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18275\)](https://www.wjpr.net/abstract_show/18275)

[DOI : 10.20959/wjpr20221-22609]

**DISINFECTION OF VIRUS IN ROOM AIR** (dashboard/abstract_id/)

Norio Ogata* and Takashi Shibata

[ABSTRACT \(https://www.wjpr.net/abstract_show/18276\)](https://www.wjpr.net/abstract_show/18276)[Article Download \(https://www.wjpr.net/abstract_file/18276\)](https://www.wjpr.net/abstract_file/18276)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18276\)](https://www.wjpr.net/abstract_show/18276)

[DOI : 10.20959/wjpr20221-22492]

**PHYTOCHEMICAL STUDY AND EVALUATION OF THE ANTIOXIDANT ACTIVITY OF TWO MEDICINAL PLANTS IN BENIN** (dashboard/abstract_id/)

Kossi Jean Marie D. Tokoudagba* and Fernand A. Gbaguidi

[ABSTRACT \(https://www.wjpr.net/abstract_show/18278\)](https://www.wjpr.net/abstract_show/18278)[Article Download \(https://www.wjpr.net/abstract_file/18278\)](https://www.wjpr.net/abstract_file/18278)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18278\)](https://www.wjpr.net/abstract_show/18278)

[DOI : 10.20959/wjpr20221-22520]

**EFFECTS OF COMBINED METHANOL SEEDS EXTRACTS OF CITRULLUS LANATUS AND ANNONA MURICATA ON MALE HORMONE PROFILE AND PROSTATE-SPECIFIC ANTIGEN (PSA) LEVEL IN DIHYDROTESTOSTERONE-INDUCED BENIGN PROSTATIC HYPERPLASIA IN MALE WISTAR ALBINO RATS** (dashboard/abstract_id/)

*Ihejiro H. A., Kalu M. U., Joel O. M. and Anyanwu C. N.

[ABSTRACT \(https://www.wjpr.net/abstract_show/18279\)](https://www.wjpr.net/abstract_show/18279)[Article Download \(https://www.wjpr.net/abstract_file/18279\)](https://www.wjpr.net/abstract_file/18279)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18279\)](https://www.wjpr.net/abstract_show/18279)

[DOI : 10.20959/wjpr20221-22649]

**CHEMICAL-QUANTUM STUDY OF RUTIN ACTIVITY AS A POSSIBLE TREATMENT FOR COVID-19.** (dashboard/abstract_id/)

Mauricio Wallis Salcedo, Manuel González-Pérez*, Daniela Pérez Mora, Ileana Sofía Águila López, Mariel Meneses Torres and Salma Valeria Pérez Rodríguez

[ABSTRACT \(https://www.wjpr.net/abstract_show/18280\)](https://www.wjpr.net/abstract_show/18280)[Article Download \(https://www.wjpr.net/abstract_file/18280\)](https://www.wjpr.net/abstract_file/18280)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18280\)](https://www.wjpr.net/abstract_show/18280)

[DOI : 10.20959/wjpr20221-22461]

**ANTIBACTERIAL ACTIVITY OF CINNAMOMUM BURMANII STEM BARK EXTRACT AGAINST STAPHYLOCOCCUS XYLOSUS** (dashboard/abstract_id/)

Sri Agung Fitri Kusuma*, Ana Indrayati, Mulyati and Danni Ramdhani

[ABSTRACT \(https://www.wjpr.net/abstract_show/18281\)](https://www.wjpr.net/abstract_show/18281)[Article Download \(https://www.wjpr.net/abstract_file/18281\)](https://www.wjpr.net/abstract_file/18281)[CERTIFICATE \(https://www.wjpr.net/abstract_show/18281\)](https://www.wjpr.net/abstract_show/18281)

[DOI : 10.20959/wjpr20221-22675]

ANTICANCER ACTIVITY OF CHEBULIC ACID BY MOLECULAR DOCKING METHOD (dashboard/abstract_id/)

Danni Ramdhani* and Sri Agung Fitri Kusuma

ABSTRACT (https://www.wjpr.net/abstract_show/18282) Article Download (https://www.wjpr.net/abstract_file/18282) CERTIFICATE (https://www.wjpr.net/abstract_show/18282) [DOI : 10.20959/wjpr20221-22692]

JATROPHA CURCAS L. LEAF EXTRACT: VALUABLE NATURAL ANTIBACTERIAL FOR STAPHYLOCOCCUS EPIDERMIDIS (dashboard/abstract_id/)

Sri Agung Fitri Kusuma*, Irma Erika Herawati, Maulia Herdiani and Danni Ramdhani

ABSTRACT (https://www.wjpr.net/abstract_show/18283) Article Download (https://www.wjpr.net/abstract_file/18283) CERTIFICATE (https://www.wjpr.net/abstract_show/18283) [DOI : 10.20959/wjpr20221-22696]

DEVELOPMENT OF UV METHOD FOR POLYMORPH OF MEBENDAZOLE THROUGH PROSPECTIVE STUDY OF SOLUBILITY, IR AND XRD. (dashboard/abstract_id/)

Durgesh Nandkishor Boob*, Sonali Niraj Choudhari and Sonali Ramnath Sonawane

ABSTRACT (https://www.wjpr.net/abstract_show/18316) Article Download (https://www.wjpr.net/abstract_file/18316) CERTIFICATE (https://www.wjpr.net/abstract_show/18316) [DOI : 10.20959/wjpr20221-22614]

A BRIEF OVERVIEW ON PHYTOCHEMICAL AND BIOPOTENSIAL OF OCIMUM SANCTUM (dashboard/abstract_id/)

Shifa Shikalgar*, Bharati Zaware and Mohammad Zaid Shikalgar

ABSTRACT (https://www.wjpr.net/abstract_show/18342) Article Download (https://www.wjpr.net/abstract_file/18342) CERTIFICATE (https://www.wjpr.net/abstract_show/18342) [DOI : 10.20959/wjpr20221-21941]

CLINICAL STUDY TO EVALUATE THE EFFICACY AND SAFETY OF HFDM01 TABLETS IN DIABETES MELLITUS AND RELATED SYMPTOMS: A CLINICAL OUTCOME BASED EVIDENCE (dashboard/abstract_id/)

Bharatbhushan Shrikhande, Neha N. Dandewar, Gayatri Ganu*

ABSTRACT (https://www.wjpr.net/abstract_show/18343) Article Download (https://www.wjpr.net/abstract_file/18343) CERTIFICATE (https://www.wjpr.net/abstract_show/18343) [DOI : 10.20959/wjpr20221-22010]

EVALUATION AND CHARACTERISATION OF A NOVEL POLYMER AS A PHARMACEUTICAL EXCIPIENT OBTAINED AS ME-C.P A MODIFIED POLYMER (dashboard/abstract_id/)

Prof. Saurabh D. Bhandare* and Dr. G. S. Deokar

ABSTRACT (https://www.wjpr.net/abstract_show/18344) Article Download (https://www.wjpr.net/abstract_file/18344) CERTIFICATE (https://www.wjpr.net/abstract_show/18344) [DOI : 10.20959/wjpr20221-22266]

FORMULATION AND EVALUATION OF PHYTOSOMAL GEL OF CAMELLIA SINENSIS FOR TREATMENT OF SKIN AGEING (dashboard/abstract_id/)

Ritu Bharati* and Ashutosh Badola

ABSTRACT (https://www.wjpr.net/abstract_show/18345) Article Download (https://www.wjpr.net/abstract_file/18345) CERTIFICATE (https://www.wjpr.net/abstract_show/18345) [DOI : 10.20959/wjpr20221-22331]

BACTERIOLOGICAL EVALUATION OF NAIRA NOTES HANDLED BY STUDENTS DURING COVID -19 PANDEMIC IN DELTA STATE UNIVERSITY, ABRKA (dashboard/abstract_id/)

Jemikalajah D. Johnson, Anie O. Clement*, Enwa F. Oghenemaro and Agholor J. Chuka

ABSTRACT (https://www.wjpr.net/abstract_show/18347) Article Download (https://www.wjpr.net/abstract_file/18347) CERTIFICATE (https://www.wjpr.net/abstract_show/18347) [DOI : 10.20959/wjpr20221-22384]

DEVELOPMENT AND IN VITRO EVALUATION OF SITAGLIPTIN PHOSPHATE GASTRO RETENTIVE TABLETS (dashboard/abstract_id/)

B. Poornima* and B. Nagarani

ABSTRACT (https://www.wjpr.net/abstract_show/18348) Article Download (https://www.wjpr.net/abstract_file/18348) CERTIFICATE (https://www.wjpr.net/abstract_show/18348) [DOI : 10.20959/wjpr20221-22415]

REACTIVITY RATIOS AND ANTIMICROBIAL STUDIES OF N-TERTAMYLACRYLAMIDE AND 8-QUINOLINYL ACRYLATE COPOLYMERS (dashboard/abstract_id/)

P. Vimala and P. Pazhanisamy*

ABSTRACT (https://www.wjpr.net/abstract_show/18350) Article Download (https://www.wjpr.net/abstract_file/18350) CERTIFICATE (https://www.wjpr.net/abstract_show/18350) [DOI : 10.20959/wjpr20221-22521]

Q-ABSORBANCE RATIO SPECTROPHOTOMETRIC METHOD FOR THE SIMULTANEOUS ESTIMATION OF METFORMIN HYDROCHLORIDE AND PIOGLITAZONE IN TABLET DOSAGE FORM (dashboard/abstract_id/)

Arunima Aravind*, Prothibha Das., Ajith Babu T. K. and Minnu George

ABSTRACT (https://www.wjpr.net/abstract_show/18351) Article Download (https://www.wjpr.net/abstract_file/18351) CERTIFICATE (https://www.wjpr.net/abstract_show/18351) [DOI : 10.20959/wjpr20221-22523]

A PHARMACOVIGILANCE STUDY OF COMPARATIVE SAFETY ASSESSMENT OF BEDAQUILINE AND LEVOFLOXACIN, AMONG MULTI-DRUG RESISTANT TUBERCULOSIS PATIENTS IN GLOBAL MULTI-CENTRE TERTIARY CARE HOSPITALS, AND AN ANTITUBERCULAR MOLECULAR PHARMACOTHERAPEUTIC ANALYSIS OF BE (dashboard/abstract_id/)

Dr. Moumita Hazra*

ABSTRACT (https://www.wjpr.net/abstract_show/18352) Article Download (https://www.wjpr.net/abstract_file/18352) CERTIFICATE (https://www.wjpr.net/abstract_show/18352) [DOI : 10.20959/wjpr20221-22524]

EFFECT OF ANTI-CGRP MONOCLONAL ANTIBODIES ON QUALITY OF LIFE IN MIGRAINE PATIENTS: AN INDIRECT TREATMENT COMPARISON (dashboard/abstract_id/)

Prashant Soni* and Evanka Chawla

ABSTRACT (https://www.wjpr.net/abstract_show/18356) Article Download (https://www.wjpr.net/abstract_file/18356) CERTIFICATE (https://www.wjpr.net/abstract_show/18356) [DOI : 10.20959/wjpr20221-22538]

LIFESTYLE DISORDER WITH SPECIAL REFERENCE TO AMLAPITTA (dashboard/abstract_id/)

Dr. Rajkamal Yadav* and Prof. (Dr.) Bishnupriya Mohanty

ABSTRACT (https://www.wjpr.net/abstract_show/18357) Article Download (https://www.wjpr.net/abstract_file/18357) CERTIFICATE (https://www.wjpr.net/abstract_show/18357) [DOI : 10.20959/wjpr20221-22546]

SOLUBILITY ENHANCEMENT OF INDOMETHACIN BY FORMING SOLID DISPERSION USING MIXED HYDROTROPY (dashboard/abstract_id/)

Madhur Patidar*, R.K. Maheshwari and Dr. Shikha Agrawal

ABSTRACT (https://www.wjpr.net/abstract_show/18358) Article Download (https://www.wjpr.net/abstract_file/18358) CERTIFICATE (https://www.wjpr.net/abstract_show/18358) [DOI : 10.20959/wjpr20221-22567]

STUDY OF EFFICACY OF KHADIRADI KWATH IN FISTULA-INANO (dashboard/abstract_id/)

Madhav Maske* and S. D. Waghmare

ABSTRACT (https://www.wjpr.net/abstract_show/18359) Article Download (https://www.wjpr.net/abstract_file/18359) CERTIFICATE (https://www.wjpr.net/abstract_show/18359) [DOI : 10.20959/wjpr20221-22571]

DEVELOPMENT AND EVALUATION OF NASAL MUCOADHESIVE GEL USING NATURAL POLYMER (dashboard/abstract_id/)

Shubham Namdev*, Abhishek Banke and R. B. Goswami

ABSTRACT (https://www.wjpr.net/abstract_show/18361) Article Download (https://www.wjpr.net/abstract_file/18361) CERTIFICATE (https://www.wjpr.net/abstract_show/18361) [DOI : 10.20959/wjpr20221-22588]

PALASHUDUMBARADITAIL BLADDER BASTI IN STRESS INCONTINENCE (dashboard/abstract_id/)

*Dr. Poonam Nagvanshi and Dr. Manjusha Meshram

ABSTRACT (https://www.wjpr.net/abstract_show/18362) Article Download (https://www.wjpr.net/abstract_file/18362) CERTIFICATE (https://www.wjpr.net/abstract_show/18362) [DOI : 10.20959/wjpr20221-22590]

A STUDY TO EVALUATE THE EFFECT OF SUPPLEMENTATION OF AYUSH SYSTEM OF MEDICINE IN OBSTETRICS CARE IN TERMS OF MATERNAL AND NEONATAL OUTCOME (dashboard/abstract_id/)

Gp Capt JC Sharma*, Prof. Sujata Kadam\$, Prof. Om Priya Mishra*, B. Chetan##, Col Narender Singh\$\$, Priyanka Sharma**, Neelima Chowdhury###, Anupoma###, Sonam Jindal### and Akhanksa Maurya\$\$\$
